

# ***DILLIN* CUSTOM SOLUTION**

Round Container Presentation

**CASE HISTORY # RCP-2K**

Accumulator/Lowerator

## **CUSTOMER PROBLEM:**

Needed automatic presentation and supply of empty containers to high-speed filler; needed container supply buffer in case of robotic loading downtime.

## **DILLIN SOLUTION:**

Provided **Accumulator/Lowerator** for containers which were robotically supplied to it.

## **System Capacities:**

- Provided up to 500 PPM to high-speed filler.
- Provided 2-3 minute surge capability based on speed of filler.
- Lowerates and accumulates twelve separate sleeves of containers at once.

## **Features:**

- Stainless steel washdown construction.
- Gently lowers containers in controlled fashion to filler infeed.
- Utilized **DeviceNet™** controls scheme.
- Used guiderail positioning to change center line of twelve sleeves of containers from that of robotic infeed to that of discharge to filler.
